🧰 EXPERIENCE

Trans-Northern Pipelines Inc.

09.2022 – 04.2026 | Richmond Hill, ON

Analyst, SCADA Systems

- Revised **300+** VB.NET scripts in **ACE Code** to support the new **SCADA (OASyS)** system for gathering and monitoring pipeline data across central Alberta and through the Ontario-Quebec corridor
- Modified **400+** station & panel displays (**XE**) with its associated **VB.NET** code in accordance to CSA Z662 standards as well as database changes (**ADE**) in a real-time processing pipeline system
- Conducted cybersecurity measures including the use of **Xage**, **Azure**, **VPN** solutions and **SFTP** servers (**WinSCP**) from/to OT & IT for corporate users to securely and remotely access SCADA means
- Developed and integrated the entire network infrastructure and setup of multiple servers, virtual machines (**Hyper-V**), SANs, switches, firewall, and workstations for the transition of our new **SCADA (OASyS)** system upgrade
- Managed and led projects, both internally and externally, associated with **PLC** and **HMI** commissioning of various industrial protocols (**Modbus**, **DNP3**, **Ethernet/IP**) to streamline a seamless execution to production environments
- Administered enterprise OT systems with the use of **Active Directory**, **Group Policy** management, and access control supporting over **200+** users in a **24/7** operational environment, while also automating account provisioning with **PowerShell**, increasing efficiency by **30%**
- Provided and maintained documentation for use of scripts, official procedures, management of change records, networking and troubleshooting within **SCADA (OASyS)**
- Delivered technical support, conducted leak detection assessments and led formal **SCADA (OASyS)** training to end-users, with all activities uploaded to **Intalex** and **Cornerstone**

🎓 EDUCATION

University of Alberta

09.2016 – 12.2021 | Edmonton, AB

BSc Major in Computing Science

- Minor in Psychology (SC)

🧠 SKILLS

Languages

- C#
- HTML / CSS
- Javascript
- Python
- SQL
- VB.NET

Frameworks

- .NET Framework
- ASP.NET Core
- Blazor Server
- Django
- Node.js
- React

OT / IT

- Microsoft Azure
- MS Office
- MSSQL
- SCADA (OASyS)
- VMware vSphere
- Xage

📁 PROJECTS

SCADA Web Portal

09.2022 – 09.2023

- Developed a **SCADA** internal web portal using **ASP.NET Core Blazor Server**, consisting of various automated C# scripts which generates customized term reports (**SQL**)

Mechanical Turk

09.2021 – 12.2021

- Developed a scalable framework using **Django** and **Django Channels**, enabling real-time behavioural game theory studies for up to **200+** users, optimizing a **PostgreSQL** backend and integrating **Amazon Mechanical Turk API** to reduce load times by **15%**

Googly Word Game 📄

01.2021 – 04.2021

- Designed an interactive ESL web application using **React** and **Node.js**, featuring a game interface with intuitive **UI/UX**, combining clicking, typing and automated pronunciations across **300+** words to strengthen foundational English skills

InfiniMood 📄

09.2019 – 12.2019

- Built a mobile mood tracking application using **Android Studio** and **Java** that functions similarly to **Twitter**, leveraging **Firebase** for real-time data management and integrating a live interactive map via **Google API**, similar to **Snapchat**
